

HB 2312 -- ENERGY EFFICIENCY INCENTIVES

SPONSOR: McNeil

This bill requires each electrical corporation, gas corporation, municipally owned electric or gas utility, and rural electric cooperative to submit an annual report to Division of Energy identifying the percentage of energy efficiency incentives distributed to low-income customers in the previous year and the amounts of any donations or grants given to community action groups or other agencies for this purpose.

Every utility operating in this state may make a monetary donation of up to \$5 million to any community action agency or other agency approved by Public Service Commission. The donation will be used by the agency to implement a demand-side program to provide grants to any individual qualifying as a low-income customer in an amount of up to \$10,000 per customer.
